

ONTRACKplus™

Introducing **OnTrackplus™** - the innovative software solution designed by Magnatech® to streamline the collection, reporting and management of unused airline credits.

Studies show that 5% of all airline tickets go unused, resulting in significant financial losses for TMCs and their clients. With OnTrackplus, you will never lose track of your unused ticket credits again. OnTrackplus allows you to maximise the value of your travel spend and avoid leaving money on the table. With easy-to-use tracking and reporting capabilities, you can quickly identify and take up your unused credits for air travel, reducing costs and improving your bottom line.

OBT Integrations:
ONTRACKplus offers integration with online booking tools for even greater efficiency and convenience, giving power to use the credits directly in the traveller's hands.

Increased Productivity:
Automates tracking and reporting of unused tickets, saving time and effort associated with manual tracking, calculation, reporting and notification.

Greater Accuracy:
Finds unreported missed flights and provides a centralised, web-based interface for accessing unused ticket data, simplifying record-keeping and improving accuracy.

Improved Profitability:
Improves revenue generation by reducing financial losses associated with unused tickets.

Simplified Credit Management:
ONTRACKplus streamlines travel management processes by providing comprehensive visibility for unused ticket management.

Build Reputation:
Enhances your reputation for responsible financial management and reporting by demonstrating a commitment to efficient tracking and management of unused tickets.
