SAFETOGO®

Introducing **SafeToGo®** - a premium duty of care application developed by Magnatech®, which provides travel management companies (TMCs) with the ability to track and locate their travellers in real-time and instantly assess any potential travel or safety risks. The application offers a comprehensive range of features that cater to every aspect of travel management.

The SafeToGo dashboard is user-friendly and easy to navigate and can be available for your clients to access directly. Travellers' locations and trajectories appear on a map and they will receive alerts if they are in an area of potential risk. They will also receive notifications about any changes to their flight itinerary, such as delays or cancellations. This information is invaluable for providing your clients with up-to-date travel information and keeping them safe.

Easy Whole-Business Itinerary Visibility:
Improved visibility and duty of care over travel itineraries. SafeToGo shows traveller locations, trajectories, status and risk level in an easily exportable list.

Real-Time Traveller Tracking:
Enhanced traveller safety and security through real-time tracking and instant assessment of potential risks in one convenient portal.

Relevant Flight Notifications:
Ensuring travellers are advised directly (and admins can see) any flight delays, gate changes, cancellations, early departures and more.

Instant Risk Advice:
Timely, comprehensive travel risk and safety information, enabling informed decision-making and risk management.

Automated Notification:
Direct email or SMS notification to travellers means not waiting for opening hours or staff involvement in message delivery.

Peace of Mind:
Know that your travellers are being advised immediately and directly for any flight changes and any risks or inconveniences to their travels.
